TECHNICAL SKILLS

Sass	Javascript	Github	Accessibility
CSS3	React.js	Photoshop	Firebase
HTML5	jQuery	Responsive Design	RESTful APIs

PERSONAL SUMMARY

Hello! I am a front end developer with a background in both philosophy and art history. I anticipate applying my analytical prowess, detail-oriented research training, teamwork skills, and passion for accessibility and social justice to my new field.

FEATURED PROJECTS

FLOWERFUL - jQuery | REST API | Sass | HTML5
- Search engine that filters plants based on flower color
- Accesses Trefle REST API data via AJAX request
- Git collaborative project where I both led and listened in a paired programming team

MTG INVENTORY - React | Firebase | Sass | HTML 5
- Magic: The Gathering card collection manager
- Uses Firebase as a real-time database to store cards
- Queries scryfall API via axios to show art and information for cards in collection

WORK BACKGROUND

STUDIO ASSISTANT

Studio Rirkrit Tiravanija, 2016-2017

I worked closely with Rirkrit Tiravanija, a Forbes Top 100 artist, and his studio and production staff to coordinate the daily operation of a professional artist's studio. Tasks included production supervision, virtual and physical collections management, database management, and both object- and exhibition-based research.

EDITORIAL INTERN

IMPOSE Magazine, Summer 2015

Working with the Editorial Team, I reviewed single, album, and installation-based releases from local, national, and international musical artists.

RESEARCH INTERN

National WWI Museum at Liberty Memorial, Summer 2012

Working within the Museum's research department, I ran tours, revised a day-long curriculum for high-school students, and used both optical character recognition software and database management skills to digitize the Museum's archive of soldiers' personal writing.

PAST EDUCATION

JUNO COLLEGE OF TECHNOLOGY

Web Development Immersive Certificate, Spring 2020

I took a nine week course in front end development with a special focus in responsive design, accessibility, and modern web development best practices.

THE NEW SCHOOL FOR SOCIAL RESEARCH

Master's Candidate in Philosophy, 2017-2018

As master's candidate, I conducted academic research in pragmatism, aesthetics, the philosophy of language, and poststructuralism.

VASSAR COLLEGE

BA Philosophy, 2012-2016

I conducted research in both continental and analytic philosophy with a special focus in art history and training in symbolic logic. I also edited the Vassar College Journal of Philosophy, a peer-reviewed academic journal.
